

ASSIGNMENT – 9

Q1. Write a JAVA program to read a string from the key board and print its reverse. Also check whether the string is palindrome or not.

```
import java.util.Scanner;
class ReverseString {
    public static void main(String args[]) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter the string: ");
        String str = sc.nextLine();
        StringBuilder rev = new StringBuilder(str).reverse();
        System.out.println("The reversed string is: "+rev);

        if(str.contentEquals(rev)) {
            System.out.println(str+" is a palindrome");
        }
        else {
            System.out.println(str+" is not a palindrome");
        }
    }
}
```

```
C:\25bcsl32\Assignment_9>javac ReverseString.java
C:\25bcsl32\Assignment_9>java ReverseString
Enter the string: racecar
The reversed string is: racecar
racecar is a palindrome
```

Q2. Write a JAVA program to capitalize first letter of each word in an inputted sentence from keyboard.

Sample Output:

Enter a sentence: india is great

India Is Great

```
import java.util.Scanner;
class StrUpperCase {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter a sentence: ");
        String string = sc.nextLine();
        StringBuilder stringBuilder = new StringBuilder();
        for (String word : string.split(" ")) {
            if (!word.isEmpty()) {
                stringBuilder.append(Character.toUpperCase(word.charAt(0)))
                    .append(word.substring(1)).append(' ');
            }
        }
        System.out.println(stringBuilder);
    }
}
```

Name – SAINA CHOUDHARY

```

    }
}
System.out.println("Transformed String is: " + stringBuilder.toString().trim());
}
}

```

```

C:\25bcsl32\Assignment_9>javac StrUpperCase.java
C:\25bcsl32\Assignment_9>java StrUpperCase
Enter a sentence: india is a great country
Transformed String is: India Is A Great Country

```

Q3. Write a JAVA program to convert a string into uppercase.

```

import java.util.Scanner;
class UpperCaseString {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter a String: ");
        String str = sc.nextLine();
        System.out.println("Upper-Case String is: "+str.toUpperCase());
    }
}

```

```

C:\25bcsl32\Assignment_9>javac UpperCaseString.java
C:\25bcsl32\Assignment_9>java UpperCaseString
Enter a String: namaste bharat
Upper-Case String is: NAMASTE BHARAT

```

Q4. Write a Java program to input a string and print the total number of characters present in the string.

```

import java.util.Scanner;
class TotalChars {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter a String: ");
        String str = sc.nextLine();
        System.out.println("Upper-Case String is: "+str.length());
    }
}

```

```

C:\25bcsl32\Assignment_9>javac TotalChars.java
C:\25bcsl32\Assignment_9>java TotalChars
Enter a String: Hello World
Upper-Case String is: 11

```

Q5. Write a java program to replace a substring with another string.

```
import java.util.Scanner;
class SubStrReplace {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter a String: ");
        String string = sc.nextLine();
        System.out.print("Enter the Sub-String: ");
        String subString = sc.nextLine();
        System.out.print("Enter the String to replace with: ");
        String replaceWith = sc.nextLine();
        System.out.println("String after sub-string replacement: " + string.replace(subString,
replaceWith));
    }
}
```

```
C:\25bcsl32\Assignment_9>javac SubStrReplace.java
C:\25bcsl32\Assignment_9>java SubStrReplace
Enter a String: Computer Technology
Enter the Sub-String: Technology
Enter the String to replace with: Engineering
String after sub-string replacement: Computer Engineering
```

Q6. Write a program that computes your initials from your full name and displays them.

```
import java.util.Scanner;
class Abbreviation {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter your full name: ");
        String string = sc.nextLine();
        String[] words = string.split(" ");
        StringBuilder stringBuilder = new StringBuilder(words.length);
        for (String word : words) {
            stringBuilder.append(Character.toUpperCase(word.charAt(0)));
        }
        System.out.println("Initials String is: " + stringBuilder);
    }
}
```

```
C:\25bcsl32\Assignment_9>javac Abbreviation.java
C:\25bcsl32\Assignment_9>java Abbreviation
Enter your full name: Adarsh Sahoo
Initials String is: AS
```

Name – SAINA CHOUDHARY
SIC No. – 25BCSL32
Lab Roll No. – 02
Date of Experiment – 7/11/2025

Q7. Write a program that receives two strings and check whether they are equal or not.

```
import java.util.Scanner;
```

```
class CmpString {
```

```
    public static void main(String[] args) {
```

```
        Scanner sc = new Scanner(System.in);
```

```
        System.out.print("Enter a String: ");
```

```
        String string1 = sc.next();
```

```
        System.out.print("Enter a String: ");
```

```
        String string2 = sc.next();
```

```
        if (string1.equals(string2)) {
```

```
            System.out.println(string1 + " and " + string2 + " are equal");
```

```
        } else {
```

```
            System.out.println(string1 + " and " + string2 + " are not equal");
```

```
        }
```

```
    }
```

```
}
```

```
C:\25bcsl32\Assignment_9>javac CmpString.java
```

```
C:\25bcsl32\Assignment_9>java CmpString
```

```
Enter a String: Earth
```

```
Enter a String: earth
```

```
Earth and earth are not equal
```
